EDUCATION

BSc. Software Engineering

COMSATS Lahore (Feb 2023 - Feb 2027) | 3.3 CGPA

SKILLS

- **Languages:** Python, JavaScript, Typescript, Java, SQL, C++
- **Backend/Database:** Node, Express, PostgreSQL, Supabase, Firebase, MySQL
- **Frontend:** React, Next.js, Redux, HTML5, CSS3, Tailwind CSS, responsive UI design
- **Tools & Platforms:** Git, GitHub, Postman, Vercel, Firebase, Supabase, Stripe, Docker, Expo

Experience

CliniConnect | Freelance

Jan 2026 - July 2026

- Designed and developed a full-stack healthcare platform connecting patients with healthcare providers.
- Built responsive web and cross-platform mobile applications using React, React Native and Expo.
- Implemented secure authentication, role-based authorization, and Row-Level Security using Supabase.
- Integrated Jitsi Meet for secure real-time video consultations.
- Developed appointment scheduling, payment processing, escrow payout workflow.
- Built backend APIs and database workflows using Supabase Edge Functions and PostgreSQL.
- Implemented retry mechanisms and scheduled background jobs for payment reliability.

Bitbash | Full Stack Development Intern

Jan 2026 - Feb 2026

- Developed automated job-scraping workflows using SeleniumBase and Playwright, combining API-driven extraction via GraphQL with browser-based HTML scraping for different site structures.
- Improved scraping throughput by reusing persistent browser sessions, multithreading requests, and reducing scrape intervals.

PROJECTS

Decentralized Equity-Crowdfunding Platform

 Next, TypeScript, Supabase, Solidity, Ethereum

- Developing a decentralized investment platform connecting business owners with investors. Using blockchain smart contracts to facilitate transparent and secure investments.
- Developed an AI-powered investor insights module that analyzes business pitches using Large Language Models (LLMs) to generate investment risk assessments and key business insights

Rental Platform

 Next, TypeScript, Supabase, React, Node

- Developed a web platform for listing homes, vehicles, and halls for rent, enabling users to create and browse rental opportunities.
- Integrated Supabase Auth, Google sign-in for easier onboarding and real-time chat using Socket.io to facilitate lister and buyer communication

Mentorship Platform

 React, Node, Stripe, JWT

- Developed a mentorship platform for students to connect with mentors offering career guidance.
- Integrated authentication with Auth0 to manage secure user access and implemented payments with Stripe & Stripe Connect, enabling mentors to receive payments for priority services

Home Services Mobile App

 Flutter, Firebase

- Developed app for users to post jobs and job viewing and professionals to view and request to complete them (job marketplace model).
- Integrated Flutter maps and LocationIQ for search by location enabling service matching
